DETAILED ACTION

Response to Amendment

1. The following Office Action is responsive to the amendments and remarks received on February 19, 2010.

Allowable Subject Matter

2. Claims 1-11 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art fails to teach the limitation of *wherein said drive unit furthermore is operative to apply a transition drive signal when switching from said grayscale drive scheme to said monochrome drive scheme, said transition drive signal being separate from signals applied during either of said monochrome drive scheme and said grayscale drive scheme*. The prior art of record, Zehner et al. (US Patent Publication No. 2003/0137521) teaches a transition signal when transitioning between monochrome and grayscale drive schemes, but fails to teach that the signal is separate from the drive scheme signal. There is no teaching or suggestion in the prior art of a separate transition signal when switching between monochrome and grayscale modes, and there is no motivation to combine such a signal with a drive scheme as taught, for example, by Zehner et al. As such, the claim limitations overcome the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
